GALLAGHER Fluid Seals, Inc.

Gallagher Fluid Seals specializes in the application, design, and distribution of fluid seals. Applying over 50 years of experience, clients can utilize our expertise to retro-fit an existing design for improved performance or discuss a new application with our engineering staff.

We offer a full range of elastomers and high-performance sealing devices. Capabilities include low-friction materials for reciprocating and rotary service, along with designs for static sealing in high-pressure conditions or harsh environments.

ISO 9001:2008
SAI Global Certificate # 0039258

Materials Management
• Authorized Distributor for the Leading Seal Manufacturers
• Extensive Inventory Available for Immediate Shipment
• Packaging: Bar Coding, Color Coding, Kitting, Private Label Packaging
• Electronic Data Interchange
• Kanban Programs, JIT Delivery, Blanket Orders
• Integrated Supply / Managed Inventory

Engineering Services
• Application Design Assistance
• Seal Design & Selection
• Material Selection Expertise
• AutoCAD & FEA Services
• Seal Evaluation & Failure Analysis
• Technical Training & Seminars

GALLAGHER Fluid Seals, Inc.
500 Hertzog Boulevard
P. O. Box 61367 • King of Prussia, PA 19406-0857

The Seal Specialist
www.gallagherseals.com
For over 50 years, Gallagher has utilized its engineering and manufacturing expertise to provide the highest quality standard and custom gaskets to fulfill your application requirements.

Materials that create a positive mechanical seal, while under compression between two mating surfaces, are known as gaskets. The compression of the gasket is caused by a required bolt load and allows defects on the mating hardware to be filled, resulting in a proper seal.

The ability of the gasket to seal the imperfections on a given surface reduces the overall production cost by reducing hardware surface preparation processes. Typically, gaskets are created by cutting sheet materials.

Gallagher Fluid Seals offers a large range of gasket materials for the broad spectrum of potential customer requests and requirements. The engineering department at Gallagher offers support in selecting the appropriate gasket type, design, and material for each customer application.

For over 50 years, Gallagher has utilized its engineering and manufacturing expertise to provide the highest quality standard and custom gaskets to fulfill your application requirements.

- Cork, Sponge, and Homogeneous Rubber
- Cloth Inserted Rubber
- Phenolics
- Spiral Wound Gaskets
- PTFE Gaskets
- Ring Joint Gaskets
- Envelope Gaskets
- Flexible Graphite Gaskets
- Non-Asbestos Gaskets
- Foam & PTFE Tapes
- RMI / EFI Shielding Materials
- PSA Backed
- Vellumoid / Fish Paper

**Capabilities**
- Die-cutting
- Laser, Flash-jet, and Water-jet Cutting
- Rotary & Flat-bed Die-cutting
- Class 100 Clean Room Facilities
- Rapid Prototyping
- Custom Assembly & Packaging
- UL Listed Materials
- FDA / NSF Compliant Materials

**Agency Approvals Available**
FDA • USP Class VI Materials • NSF 51, 61 • USDA 3A • UL • WRAS • KTW
