Gallagher Fluid Seals is happy to introduce its latest video, which deals with spring-energized seals.

In the clip above, Gallagher Engineering Manager Craig Beil discusses these seals and the tools and materials used to manufacture them. Gallagher can meet your requirements for PTFE sealing in most, if not all, environments and operating conditions.

Be sure to watch our previous videos on GORE expanded PTFE seals and static seal gaskets to learn more about our products.

And don’t hesitate to contact Gallagher with any questions, whether they’re about spring energized seals or any other product or service. We’ll be happy to hear from you.
