

GFS GS-360 Pump & Valve Packing

Braiding from continuous acrylic blended fiber

Description

Braided from continuous acrylic blended fiber, Style GS-360 is impregnated with PTFE and a proprietary inert lubricant. Style GS-360 packing is also a non-staining and non-contaminating packing with excellent heat dissipation properties. A durable and resilient packing for general service applications such as centrifugal, rotary, and reciprocating pumps, as well as valve service. Our proprietary lubricant is used for extremely low friction at startup and during operation.

Construction:	Interlock Braid
Temperature Rating:	500°F / 260°C
pH Rating:	0 - 12
Shaft Speed Rating:	2500 FPM / 12 MPS
Pressure Rating:	500 PSI / 34 Bar
