

GFS PTFE-920 Pump & Valve Packing

Braiding from Lubricated PTFE/Graphite filaments

Description

Braided from Lubricated PTFE/Graphite filaments, Style PTFE-920 is an economical alternative to most PTFE/Graphite packings. Style PTFE-920 is a self-lubricating, low friction packing good for most general service applications. Our proprietary break in lubricant ensures low shaft wear, while maintaining good packing to shaft contact. Style PTFE-920 has the high heat dissipating qualities of Graphite, with the added chemical resistance of PTFE.
